BUSINESS EXPERIENCE

2019 - 2020
BOSTON CONSULTING GROUP, Bangkok
Case Team Assistant (10 months)
- Empowered client's procurement team in implementing initiatives to generate synergy value, as part of a post-merger transformation program between 2 leading power-generation companies in Thailand.
- Integrated and analyzed historical purchasing data between 2 companies; identified potential cost-saving initiatives and recommended actions to client, leading to ~7% operating cost reduction.
- Introduced and implemented a digital enabler for commodities contract worth ~$30m to increase competition, resulting in ~3% reduction in annual material cost.
- Applied an inventory management model to optimize inventory levels for 40k+ spare parts & equipment to reduce excessive inventory spending.
- Assessed Covid-19 impact on client's supply chain to ensure business continuity; formulated a renegotiation plan with 5 selected suppliers to create new opportunities for cost reduction.

2018 - 2019
LSE SU ECONOMICS SOCIETY, London
Research Associate & Committee Member (9 months)
- Collaborated in production of 37-page academic report on implication of Rio de Janeiro's crime displacement on economic development.
- Compiled crime and spatial night light data from 42 municipalities in Rio de Janeiro using spatial analysis software; produced data visualization as part of data analysis process.
- Utilized econometric modelling techniques in development of an economic model; drawn conclusions based on model outputs and recommended future research questions.
- Presented and published research findings as part of LSE SU Economics Society academic journal launch.

2018 - 2018
BANK OF THAILAND, Bangkok
Economic Research Intern (2 months)
- Initiated a research project on application of search query data in studying tourism demand in Thailand for macroeconomic research department.
- Collected and processed search query data from Google Trends API, and tourist inbound data from Thailand's 10 major tourist arrival countries.
- Incorporated search query data into conventional tourism forecast models and conducted robustness check using data analysis software.
- Evaluated usefulness of search query data by comparing model's forecast accuracy with a benchmark and presented findings to department executives.
